

Citrix XenApp 6.5 Advanced Administration CXA-301-11

Training/Ordering Details

Code: CXA-301-11

Price: €2295 (10% reduction for interAct/Ingram Micro partners)

Location: interAct Training Center, Oudestraat 119, 2630 Aartselaar

Order: Fill out [training registration form](#) and send to info@interact.be or fax +32 (0)3 870 60 21

Course Description

Target Audience

CXA-301 is intended for customers running Citrix XenApp 6.5 for Windows Server 2008 R2 who need to optimize, monitor and troubleshoot their environment. Much of the course will also be applicable to customers running XenApp 6.

This course targets the following professionals: Citrix Partner Network members, IT professionals, such as Server and System Administrators, System Engineers, Analysts, Consultants, and Architects.

Preparatory Recommendations

Prior to taking CXA-301, Citrix recommends that students take CXA-206 Citrix XenApp 6.5 Administration or possess the following knowledge and experience:

- Experience operating a XenApp farm, including administering users, publishing applications, and setting policies
- Basic understanding of the components of a XenApp environment and server roles
- Basic knowledge of the purpose and goals of virtualization technology
- Basic experience installing and administering Windows Server 2008 R2 with Remote Desktop Services
- An understanding of computing architecture, including network and storage devices, device drivers and operating systems
- Basic understanding of network security principles

Key Skills

Upon successful completion of CXA-301, students are able to:

- Isolate and repair faults in a XenApp environment
- Expand a XenApp environment to increase capacity and robustness
- Ensure the continued health of a XenApp environment
- Improve the user experience through a variety of means
- Monitor a XenApp environment proactively and reactively
- Provide flexible application access while maintaining security
- Integrate other Citrix products (such as EdgeSight and NetScaler) with XenApp

Module Outline

The topic outline for CXA-301 is as follows:

- Module 1: Troubleshooting the XenApp Environment
- Module 2: Scaling the XenApp Environment
- Module 3: Creating Farm Redundancy
- Module 4: Maintaining the XenApp Environment
- Module 5: Optimizing the XenApp Environment
- Module 6: Optimizing the User Environment
- Module 7: Optimizing Printing
- Module 8: Monitoring XenApp with Standard Utilities
- Module 9: Monitoring XenApp with EdgeSight
- Module 10: Securing XenApp

Exams

This course prepares the students for the exam “1Y0-A22 Citrix XenApp 6.5 Advanced Administration” which is required for the certificate “CCAA for XenApp 6”.
